# The secure feeling of good quality

Welcome to Professional Hygiene.

Powerful design, premium quality and function

**The dispenser series**

08.2016

Sensor-Paper towels, AutoCut  
Soaps/foam soaps

Paper towels, Interfold  
Centrefeed, Toilet paper

Waste containers  
Cleaning roll racks

Comprehensive solutions  
for all lavatories

ONLY BY CONSISTENTLY FOLLOWING YOUR PATH WILL YOU ACHIEVE YOUR GOAL.  
**WEPA. A successful specialist trade partner for 68 years.**

**Dear Customers,**

Excellent hygienic features, first-class quality, a high degree of ergonomics with the lowest possible consumption, simple handling, the best consumable material... All these factors play a key role in our company's dispenser designs.

You can now see what our design work has produced in our new dispenser brochure – the one you are currently holding in your hands. Our product developers have once again done their best for you this year. Innovations like the hygienic and economical Jumbo centrefeed toilet paper dispenser, the universal Centrefeed Plus dispenser with removable paper outlet or the Folded paper towel dispenser Mini are just a few examples.

In addition, we have optimised our previously available range down to the tiniest detail: for example, by adjusting the bag dimensions for our soap cartridges for even simpler and quicker handling, or by redesigning the cartridge holder so the fill level of our soaps is now fully apparent.

With that, I'd like to introduce our new brochure.  
Use it to choose the optimal dispenser solutions to best fit your needs!

We would like to wish you continued success.

Yours,

Matthias Post  
Head of Product Management and Marketing  
WEPA Professional GmbH

Easy to use, maintenance-free and reliable

With individually configurable locking system and design feature

Hygienic dispensing and economic consumption

**PLUS:** many new impressive details

## New additions

**In top WEPA quality:**

The new product design saves space and blends in harmoniously in almost every lavatory

With individually configurable locking system and design feature

Intuitive and robust

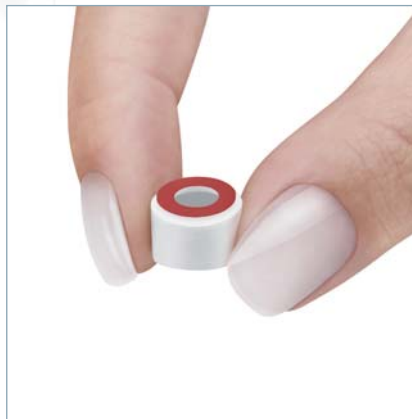

Hygienic dispensing and economic consumption

Easy to use, maintenance-free and reliable

Easy-to-read fill level indicator

The accompanying internationally understandable instruction guide is packed with illustrations and answers all the important questions regarding assembly, the locking mechanism, filling and changing the design ring. This leads to greater customer satisfaction and makes it easy to handle.

**In detail: the clever locking system**

All WEPA dispensers have a door, enabling them to be filled quickly and easily. The easily accessible twist lock on the side ensures a high level of hygiene by keeping out almost all moisture and dust. The universal key can be used for all dispensers in the range.

And WEPA continues to innovate! The lock can be transformed into a permanent lock in all "non-sensitive" areas! Simply attach a retaining ring on the inside and the key is now permanently locked in the dispenser, making it possible to open and close it at any time.

## Comprehensive solutions for all lavatories Design made by WEPA

### In detail: simple and easy to install

#### DRILLING HOLES AND MOUNTING ON THE WALL

All WEPA dispensers come with a separate mounting plate. Simply hold the mounting plate against the wall, mark the drill holes, drill the holes, screw the mounting plate in place and mount the WEPA dispenser on the wall – done! The benefit to you: if you need to replace a dispenser, e.g. if it has been vandalised or is being upgraded, the mounting plate remains on the wall and only the dispenser itself needs to be replaced. Do you already have an earlier WEPA model? The new range of dispensers uses the same hole configuration as the previous range. Simply change the mounting plate! In most cases there is no need to drill any new holes.

#### GLUING INSTEAD OF DRILLING

What if you're not permitted or able to drill holes? No problem! All WEPA dispensers have 3-4 areas on the back for applying adhesive. Simply apply an industrial adhesive according to the manufacturer's instructions and glue the dispenser to the wall! The clean and quick alternative if drilling holes isn't possible.

### In detail: the material

#### ABS PLASTIC

(Acrylonitrile Butadiene Styrene)

Very robust, impact-resistant and easy to clean

Temperature-stable up to approx. 95°C (Vicat softening temperature)

If separated correctly on disposal, it is easy to melt down and reuse

The cutting teeth on the toilet paper dispensers are designed to ensure the hygienic removal of the consumables without the risk of cutting your hand

#### STEEL/METAL

Reliable, durable and safe: the cutting technology on the AutoCut and Sensor hand towel dispensers is manufactured from special hardened steel

Internal and therefore inaccessible knife

for installation

**WEPA allows you to incorporate your corporate colours in your lavatories**

Have you ever thought about how many guests, customers, visitors, business partners, clients, employees, patients, travellers, suppliers, etc. use your sanitary facilities each day?

Why should your company identity stop at its threshold?

WEPA Professional brings colour into play! Out with monotony! Give your lavatories some individuality. Use the design ring to incorporate your corporate colour scheme in the lavatory or simply to coordinate the WEPA dispenser with your lavatory fittings.

**It's child's play – in less than five minutes you can turn a WEPA dispenser into your WEPA dispenser**

All new WEPA dispensers are fitted with an exchangeable design ring. Simply open the WEPA dispenser, release the design ring, attach the design ring in the new colour – done!

## The design ring in 16 trendy colours for all dispenser models New: exclusive and only from WEPA!

### Individuality defines us all – it's your choice

Each WEPA dispenser is supplied with a white design ring as standard.

Three additional standard colours: anthracite, blue and sand are already waiting for you in our warehouse.

For order quantities of min. 20 boxes (= 200 design rings per model), we have a further 13 special colours in our factory warehouse.

Pallet **48**

### 331090 AUTOCUT

System paper towel rolls dispenser

Frequency/consumption

Dimensions (mm)

**368 (W) x 350 (H) x 220 (D)**

Colour **White**

PU **1**

Pallet **40**

### AutoCut dispenser

Automatic dispenser system – no battery or power consumption

Economic consumption: up to 448 uses per filling

Unsurpassed reliability thanks to new cutting technology

### The disposable system of WEPA

Ensure perfect hygiene  
in every lavatory

Consisting of a pouch and a pump, the WEPA disposable system makes it quicker and easier to refill the dispenser – no more fuss with refill canisters.

**The result:** a permanently fresh, drip-free pump and an accurate traceability of stocks.

### Liquid and foam soap by WEPA

Pleasantly fragranced and suitable for frequent hand washing thanks to a pH ranging from 5.0 to 6.5

WEPA liquid soap is ideal for the intensive removal of medium to heavy contamination. Whereas WEPA foaming soap is the elegant, ecological and economical choice for removing light to medium contamination.

WEPA welcome to *Professional Hygiene*

## Give viruses no chance! Under this motto, we work actively for more hand hygiene.

Our hands are our most important tool. They come into contact with numerous people and objects every day, and unfortunately as a result, also with viruses and bacteria. Washing and drying hands properly is still the best way to protect yourself from infections and illnesses.

For the best protection, however, your hands also need to be dried carefully, since it is very difficult for germs to multiply and survive on clean and dry hands.

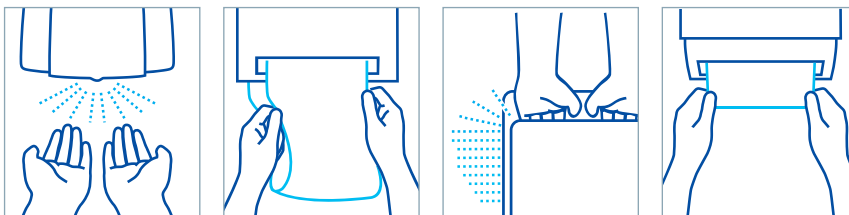

### A small contribution! With a great effect!

Besides customer and retailer training, we also offer intensive support to kindergartens, schools and to hygiene officers with respect to hand hygiene. For example, through our annual participation in the international Global Handwash Day where we hand out information flyers, useful giveaways and provide advice on our website.

Our current "hands on!" campaign raises awareness on an obvious approach to daily hygiene in kindergartens and day care centres. We also motivate children for more hand hygiene with 9 funny motif lines.

## Paper hand towels More hygienic, faster and more popular

### From wet to dry and clean in a few seconds

Hands are one of the main transmitters of infectious pathogens. Only paper hand towels guarantee a strikingly reduced bacterial count to exclude cross-contamination.

### It does not make sense to save on quality – because cheap is not equal to inexpensive!

Cheap prices are only possible due smaller sheet sizes, low grammage or poor cellulose.

The result: Users consume more to attain the same cleaning and drying performance! Refill and maintenance intervals, even storage and ordering costs increase.

**With high quality tissues,  
one often only needs one sheet  
for drying hands.**

Source: TÜV Rheinland, Sept 2005 and Aug 2011, study by the University of Westminster towards the end of 2008 as well as Intermetra 2008

Robust, reliable and safe to use

**New: Now with dual function!**

**It's your choice!**

Either paper outlet with "demolition teeth" when quickly a larger amount of paper towels is required or the economical "one-sheet output" for maximum Economic efficiency and hygiene.

Replaceable paper outlet in the delivery included

## More hygienic and economical by single sheet dispensing Centrefeed toilet paper dispenser

### New: our elegant centrefeed design

#### The advantages:

**Exceptionally hygienic** – only the sheet to be used is touched.  
No need to touch the dispenser or reach in.

**Incredibly economical** – single sheet dispensing significantly reduces paper consumption and even reduces the risk of blocked pipes.

**Utterly yielding** – 720 sheets per roll, allowing long intervals between refills

**Vandalism prevention** – rolls that do not give rise to theft

## Your reliable partner for cleaning and hygiene **WEPA Professional**

### About WEPA Professional

WEPA Professional is a 100% subsidiary company of the WEPA Group. With over 3,000 employees and 11 locations across Europe, we play in the Premier League of the European hygiene tissue manufacturers. This ensures you to benefit from all advantages of a nearly Europe-wide on-site production – market oriented quality, attractive prices and first class reliable service.

### Environment & Responsibility

As a responsible manufacturer of hygiene tissue paper, the WEPA Group has for many years been paying special attention to sustainable resources and a paper production that in conformity with the environment. A large part of our hygiene paper products consists of 100% recycled materials and is FSC® (FSC®-C016151)- or PEFC-certified. The WEPA Group was also certified in acc. with ISO 9001 and ISO 14001 and engages itself in the "EU Ecolabel" as well as "Blue Angel" projects.

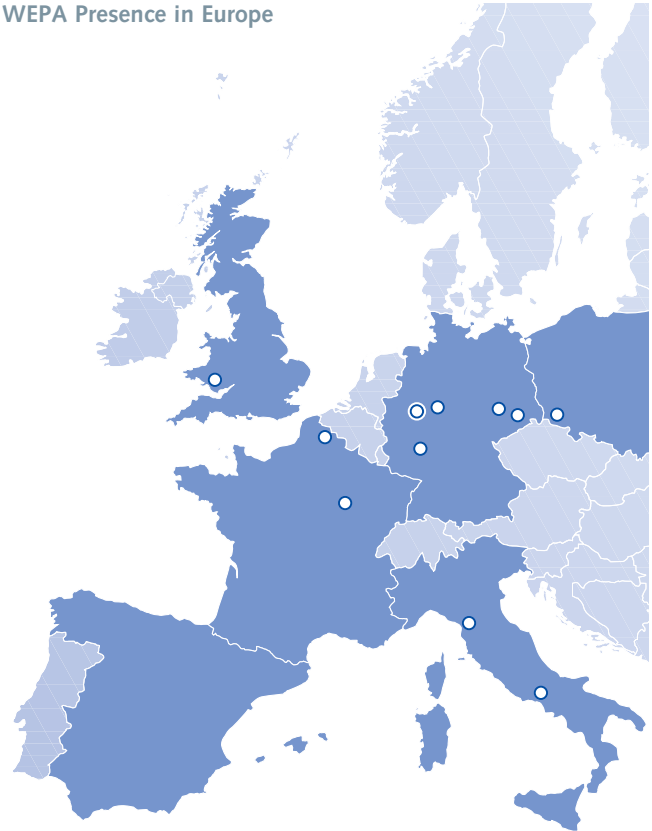

### Quality & Logistics:

WEPA unites top-class paper production know-how with unique technical equipment. Constant product development, a consequent market orientation and Europe-wide sales are our guarantee for continuous innovation and advancement. With our highly modern warehouses and sophisticated logistics, we ensure delivery performance on the highest level.

### Service & Availability:

Our experts will gladly assist you with your purchasing decision. Whether at short notice on the telephone, by fax or e-mail or in a personal talk on site. Our website [www.wepa-professional.de](http://www.wepa-professional.de) always provides you with the latest news, the most current overview of our entire range and interesting facts about paper production, use and hygiene. EDI interfaces or e-data for your ERP system are also easily realized.
